EXPERIMENT -5

AIM:

To experiment on packet capture tool: Wireshark

Capturing and analysing packets using wireshark tool:

To filter, capture, view, packets in Wireshark tool. Capture 100 packets from the Ethernet: IEEE 8023LAN interface and save it.

PROCEDURE:

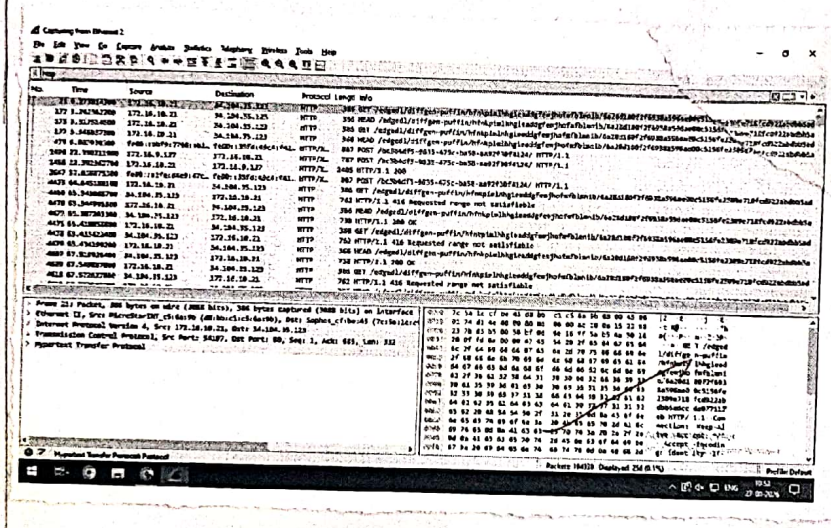

Select Local Area Connection in Wireshark
Go to Capture Options
Select stop Capture automatically after 100 packets
Then click start Capture
Save the packets.

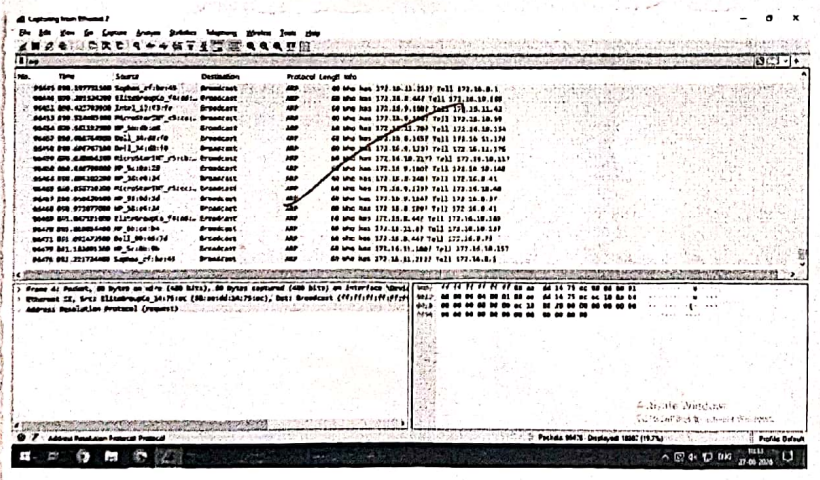

1. Create a Filter to display only TCP/UDP packets inspect the packets and provide the flow graph.
→ Select local Area Connection in Wireshark
→ Go to Capture Options
→ select stop Capture automatically after 100 packets
→ Then click start Capture
→ Search TCP Packets in Search Bar
→ To see flow graph click Statistics flowgraph
→ Save the Packets.
2. Create a filter to display only ARP packets and inspect 50 packets
→ Go to Capture Options
→ Select stop Capture automatically after 100 packets
→ Then click start Capture
→ Search ARP packets in Search bar
→ Save the Packets

Scanned with OKEN Scanner

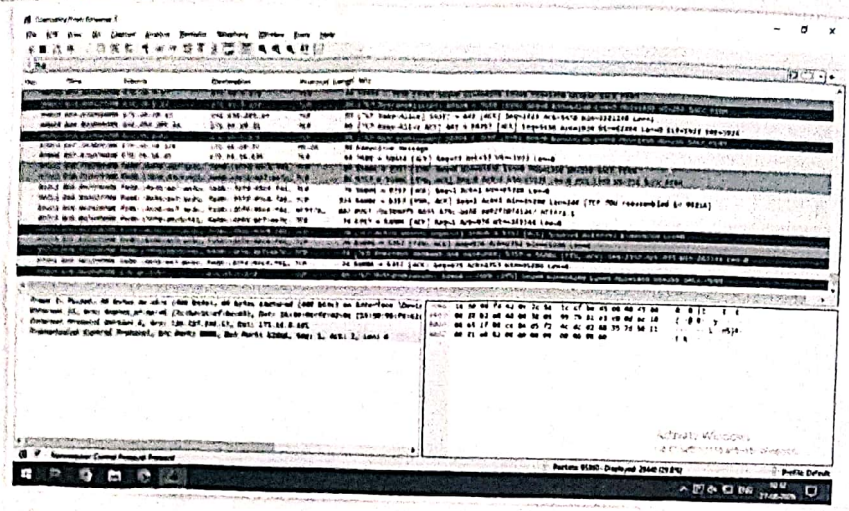

3. Create a filter to display only HTTP packets
→ Select Local Area Connection in Wireshark
→ Go to capture option
→ select stop capture automatically after 100 packets
→ Then click start capture.
→ Search HTTP packets in search bar.

4. Create a filter to display only IP/ICMP packets and inspect the packets
→ Select Local Area Connection in Wireshark
→ Go to capture option
→ select stop capture automatical after 100 packets
→ Then click start capture
→ Search ICMP/IP packets in search bar.

Scanned with OKEN Scanner

RESULT:

Thus the Experiment was completed/executed successfully using Wireshark.
